V. Environmental Health Program Update

A. Sewage Rules Update/Discussion

Mr. Weisdack reported that the Public Health Council approved the sewage rules on March 4, 2006. The implementation date will be January 1, 2007.

Mr. Weisdack reviewed section 3701-29-13 with the Board. This section pertains to soil absorption provisions. The regulation says that there is to be at least 3’ to a limiting layer with the exception of a perched seasonal water table. Then the requirement is 2’ to the perched seasonal water table.

The Board can grant variances to this regulation, but a list of all these variances and the reason for granting them must be submitted to ODH annually.
The regulations also require sampling from the gradient drain (curtain drain) twice per year. Mr. Weisdack stated that the Board would need to decide if the Health District should have a list of service providers to do the sampling or if health district staff should do the collections.

The State is developing a technical committee for the regulations. Mr. Weisdack has asked what is to be done with the Amish communities, but nothing has been rectified as yet.

Mr. Weisdack asked the Board to review section 3701-29-13 carefully. A sewage workshop will need to be scheduled to go over the new rules.
