V. Environmental Health Program Update

A. NPDES Permit Discussion

The beginning process for getting an off-lot discharging system after January 1, 2007 is to have the lot evaluated by the health district. The health district staff must then disapprove the lot for an on-site system. The person(s) proposing the off-lot system must get approval through the OEPA for an NPDES permit. The health district is responsible if the information that is submitted is not accurate. We would be subject to $25,000 fines and felony charges. We will also be responsible for assuring that these systems are maintained.
We need to develop policies and processes to decide that a property cannot support an on-site system. One thought was to require an Engineer to design the system.

Mr. Tusick explained to the Board some of the other requirements made by the OEPA.

We have received a Memorandum of Understanding from OEPA. Under this MOU, the local health districts would have to do all of the field work and then give the homeowner a letter stating an on-lot system could not be installed. The homeowner would then submit this to OEPA for their NPDES permit. A $200.00 fee would have to be collected from the homeowner and sent to OEPA. None of the fee would remain with the local health districts. The local health districts are responsible for assuring the systems are maintained.

If the MOU is not signed, homeowners will not be able to get a discharging type sewage system for their property. Mr. Weisdack and the Board all agreed that it is not a good idea to sign this MOU. They stated that they didn’t want to inconvenience the property owners, but the penalties under this MOU are excessive and the MOU criteria is open ended.

Mr. Weisdack indicated that he would be contacting some of the other health districts to see what action they are taking with the MOU.

B. Smoke Free Ohio

Issue 5 which prohibits smoking in public places passed on Election Day. From what we understand, this law indicates that the local health district will do the investigation and legal action and all fines will go to ODH. The rules for this law have not been written. The Ohio Department of Health has stated that they will have rules written and implemented within the next 6 months.

Under this law, the health districts will have to write citations for individuals who are smoking. Violators will be fined. Cases that must be taken to court, must be taken to municipal court.

VI. Personal Health Services Update

Mrs. Scherer reported that the flu clinic went well. There were 638 vaccinations given. Time studies were done throughout the clinic. Most people waited less than 5 minutes. Mrs. Scherer reported that she had received many thank you notes and calls about how well the clinic was run. Another flu clinic is scheduled for this weekend.

Beginning January 1, 2007 all of the State of Ohio will be covered by Medicaid managed care. This previously was only a pilot program in some of the larger counties. This will affect the WIC office because of the way they normally receive income verification. It will also affect the Nursing division because in order to bill for Medicaid services we provide, we will have to subcontract with each of the managed care providers that are in our county. Our county has 3 providers. We also must subcontract with Trumbull & Portage county providers because we provide service to some of their residents. This will make it more complicated with billing and contracting. We must have each person who provides services for these children credentialed through each of the plans. Not only must the physicians be credentialed, but the nurses as well.
A. WIC

The WIC office is planning their 1st Annual Christmas party for December 6, 2006 for the WIC clients. There will be activities, crafts and nutritional snacks for the children.

The WIC and Nursing Divisions were recently honored at an awards ceremony for Excellence for Outstanding Performance and Exceptional Commitment to Teamwork to young children. This was presented by the Tri-County Association for the Education of Young Children.

B. Health Education

There was no information about health education.
