V. Environmental Health Program Update

A. Meeting with Dr. Alvin Jackson

Mr. Weisdack reported that the meeting with Dr. Jackson went well. There was one other health commissioner and two other people that attended as well as other representatives from ODH as well as an Engineer. The information about the newer NPDES units used for off-lot systems not meeting the standards was given to Dr. Jackson and his staff. It was reported that other counties were finding the same results. It appeared that Dr. Jackson had not heard some of this information.

Dr. Jackson indicated that he wanted to have another meeting with Mr. Weisdack and the group in February. It also seemed that he wanted them to be involved in the development of the sewage rules.

B. Meeting with Senator Grendell
Mr. Weisdack met with Senator Grendell and other interested parties recently about the proposed sewage rules. The issue about the vertical separation distance continues to be a problem. Senator Grendell is planning to attend the next meeting in February with Dr. Jackson.

VI. Personal Health Services Update

A. Public Health Emergency Preparedness

The CDC has proposed Phase IV funding for PHER. We have only expended 28% of our PHER funds to date. We will not be pursuing the Phase IV funding.

Mr. Mix stated that the Board was being asked to allow the purchase of a Smart Board and a cargo trailer. The cargo trailer will be used to respond to an event by setting up a second POD location.

Ongoing efforts for the H1N1 efforts include collaborating with employers, retail businesses and pharmacies to assure the private sector’s capacity for vaccinating residents.

The Board was also asked to approve a contract with the Association of Ohio Health Commissioners in which the AOHC will provide the after action report. Currently over 50 local health departments are participating in the project.

The first edition of PHEP Grant Standards has been published. This was a collaboration with AOHC Preparedness workgroup members, ODH staff and local health departments.

B. Nursing

To date, we have administered nearly 12,500 H1N1 vaccine since October 12, 2009. Because of diminished demand, efforts will be focused on offering the vaccine by appointment at the Friday morning clinics and at children’s immunization and well child clinics. We will be working to keep private providers adequately stocked and will be working with pharmacies to encourage them to vaccinate. Several pharmacies have held clinics already.

The IAP bi-annual Assessment, Feedback, Incentives and Exchange Evaluation with ODH was completed in December. Our vaccination rate is now 43%. This was an improvement over an assessment conducted 2 years ago. Some of the barriers include inadequate reporting by private physicians who are not VFC providers, cultural barriers with Amish residents, and resistance by those who feel childhood vaccinations are harmful.

The Board was asked to approve the Maternity Licensure for UH Geauga Regional Hospital. Linda Knell visited the hospital in July with the Ohio Department of Health.

C. WIC

The WIC December caseload was 982.

D. Health Education

There was no report for health education given this month.
