V. Environmental Health Program Update

a. General Information

Mr. Weisdack reported that he attended the health commissioner’s conference in September. Most of the meetings were in regards to becoming an accredited health department. They discussed who could become accredited and how long it would take. Many of the health districts at the meeting did not want to discuss accreditation because of all of the unknown factors. Mr. Weisdack stated he had been informed that the Ohio Department of Health was considering reducing the number of health departments based on the Public Health Futures Report. This caused many concerns with the other health districts. AOHC has denied that was their objective.

The sewage rules are completed except the vertical separation issue. The vertical separation distance still has not been discussed and addressed completely. This is very critical to Geauga County. The rules were to become effective January 1, 2013. Because they must be finalized, sent out to the local health districts for comments and then sent to JCARR for review, Mr. Weisdack has been told by a sewage committee member he does not anticipate they will become effective before March of 2013.

As of October 15, 2013 there were 205 cases of meningitis in the United States, fourteen states are involved, and fifteen people have died. This meningitis outbreak is associated with steroid injections the patients had received for back pain. Ohio has had three cases reported.
Mr. Weisdack reviewed the number and type of sewage installation permits so far this year. There is an increase over 2011. Mr. Weisdack attributes the increase to the For Sale of Property.

Mr. Weisdack has been asked by the State Auditor’s office to present a seminar on gas wells November 29, 2012. The Board gave Mr. Weisdack their permission to do the presentation. Mr. Weisdack indicated that he would be doing this while he is scheduled to be on vacation. Mrs. Livers stated that Mr. Weisdack should be sure to take the vacation time he is missing.

Mr. Weisdack received the final paperwork from the Manufactured Homes Park Commission. There currently are eleven Manufactured Home Parks in Geauga County. The inspections of the park are very time consuming.

The Manufactured Homes Park Commission (MHPC) would like local health departments to sign a Memorandum of Understanding to do the inspections of the parks for them. The health departments would receive an average of $125.00 per inspection. The MHPC would retain all license fees. Only one inspection per park will be permitted. Any re-inspection of a park would require permission from the MHPC. The local health departments would still be required to handle nuisance complaints within a park. The most the Geauga County Health District would get is $1,600.00 per year, which does not cover the cost of doing the inspections.

We receive no funding for nuisance inspections. If there are any funds in excess of $2,000.00 in the MHP line item, it must be remitted to the Manufactured Homes Park Commission. Mr. Weisdack is in discussion with the Auditor’s office about the possibility of moving the funds we currently have.

Mr. Weisdack stated he would be giving his recommendation about the program at next month’s meeting.

VII. Personal Health Services Update

a. Public Health Emergency Preparedness

Mr. Mix reported that the staff is working to develop a closed POD at Kent State Geauga Campus that will be run by the KSU student nurses. The students and staff will be participating in a flu clinic at KSU Geauga Campus on October 17, 2012. The Chardon Surgery Center has been added as a closed POD recently.

The MRC conducted a drive-thru flu shot clinic on September 9, 2012. This fulfills the requirements of the PHEP grant for engaging the MRC.

This was one of the busiest summers for communicable diseases. There were three outbreaks within Geauga County. Mr. Mix stated that the staff continues to send notices through the Geauga County Health Alert Network to keep them informed about public health events.

b. Nursing Services

The nursing staff has held a variety of flu shot clinics. Clinics are being held at the senior centers, assisted living and nursing homes, private businesses and our regular Friday morning clinics. To date, the nursing staff has given approximately 40% more flu shots than last year.

The Board was asked to approve the GY2013 Immunization Action Plan (IAP) budget for $26,422.00. This represents a 28% decrease from 2012 funding levels. The purpose of the IAP grant is to increase childhood immunization rates in Geauga County. The goal is that 90% of children will be up-to-date on immunizations by 36 months of age. The staff also educates the public about the importance of vaccinations and to encourage physicians to become vaccine providers.

c. WIC

The WIC caseload for April was 814, which is a 1.5% decrease since August.

The new fiscal years began on October 1, 2012. Despite program cuts of nearly 18%, the staff is committed to maintaining the satellite clinics. The Middlefield clinic represents 35-40% of the caseload.

d. Continuous Quality Improvement/PHAB Accreditation

The poster presentation of the CQI project at the AOHC Fall Conference went very well. The storyboard poster was presented along with a PowerPoint presentation. Mr. Mix presented the storyboard to the Board of Health.

Mr. Weisdack stated that Mr. Mix’s presentation at the AOHC meeting was very well received.

Mr. Mix stated that what the committee found was resistance by the staff. They were not resistant to improving the quality, but to the fact that they do not have the time or resources available to commit to quality. The staff has been reduced significantly in the last few years, but the same workload exists. He stated that the committee was considering selecting a department and letting them come up with a project. The CQI committee would help them with the process.
VIII. Old Business

a. Strategic Solutions Imaging Proposal

The Board was presented with another proposal from Strategic Solutions.

Mr. Weisdack stated he reviewed some files that the company scanned into a digital image. He stated that his only suggestion would be to categorize each section of the file’s contents. Mr. Mix indicated that could be done. Mr. Weisdack stated that he was impressed with the digital image. He anticipates that the residents will be very happy this service.

The Board took a five-minute break.

Mrs. Livers moved 10.12-a to approve a two-year contract with SC Strategic Solutions for scanning services not to exceed $43,500.00. Dr. O’Hara seconded the motion.
