Dan Mix, Geauga County Health District, started the meeting at 10:00 AM

1. Group introductions
2. Dan distributed copies of the Geauga County Unintentional Drug Death 2015 Report and the RWJF County Health Rankings. The number of drug-related deaths increased by more than 50% in 2015 compared to 2014 to 18.2 per 100,000, which exceeds the 2014 rate of 16.2 per 100,000 for all of Ohio. Geauga ranked 2nd overall in the state of Ohio for the county health rankings. Some of the areas of focus include adult obesity and physical inactivity, which are on the rise, while adult smoking and excessive drinking have declined.
3. Committee chairs reported on progress for each action step, as shown in the attached CHIP progress report
4. Dan Mix reviewed the tentative schedule for the 2016/2017 community health assessment. All community agencies will be invited to three workshops to prepare the surveys that will be administered to parents of children (0-11 years), youth 12 to 18 years, and adults 18 years and older. As was done in 2011, the three surveys will be prepared from the National Survey of Children's Health, the Youth Risk Behavioral Survey (YRBS), and the Behavioral Risk Factor Surveillance Survey (BRFSS). All agencies will have a part in deciding what questions are included in the survey, including local indicators that may provide valuable information on program outcomes.
5. The next CHIP progress report-back meetings are scheduled for May 19, 2016, July 21, 2016, September 15, 2016, and November 17, 2016. All meetings are at 10:00 AM at the Geauga County Board of Mental Health & Recovery Services
