Instructions:

a. Print clearly and complete both sides.
b. Use only one form for equipment changes you propose for each public swimming pool, spa, or special use pool.
c. Other substantial alterations requiring more extensive plan review shall be submitted with plans and a completed Application for Plan Review, HEA 5215.
d. All equipment shall be listed with NSF, ETL, or as approved by the Director. Changes to equipment, including the use of additives or substitute materials/agents/chemicals that affect equipment performance and are not authorized by the manufacturer affect the product listing; accordingly, such substantial alterations must be authorized.

I. Equipment Replacement Plan Review Fee Schedule

- Replacement of a disinfection reagent feed device with a different method of delivery, different reagent, or that changes the disinfectant output;
- Replacement of a circulation filter with a different size, different method of filtration, or different media, or a different method of operation;
- Replacement of a circulation, jet, or special feature pump that changes the operation of the pool or associated equipment;
- Replacement of a vacuum limit switch (VLS).

ALL are substantial alterations requiring plan review using this form. The plan review fee is forty dollars.

NOTE: Replacement of an Automatic Chemical Controller or of a pH reagent feeder is not a substantial alteration. Replacement equipment which is identical to the design and operation of the original and previously approved equipment is considered as maintenance and repair.

II. Pool, Spa, Special Use Pool Design (existing)

01 Specifications

a. Pool/Spa Volume ________ gal
b. Required Turnover Period
   - Pool—480 min (8 hr)
   - Spa—30 min (1/2 hr)
   - Wading Pool—120 min (2 hr)
   - Special Use Pool—240 min (4 hr)
   - Other

c. Required Flow Rate (1a/1b) ________ gpm

d. Actual Flow (as measured by a flow measuring device) ________ gpm

III. Equipment Replacement

02 Disinfection

<table>

<tr>
<td>Replacement</td>
<td>Vacuum</td>
<td>Press.</td>
<td>Sand</td>
<td>DE</td>
<td>Cartridge</td>
</tr>
</tbody>
</table>

NOTE: 1. Changing filter media within the same filter unit is an alteration requiring approval
2. Flow through a filter shall not exceed the rated capacity (see 03e)
3. Filters in parallel shall all be of equal size/capacity.
<table>
<thead>
<tr>

</tbody>
</table>

The following criteria shall apply:

- a. Provide a pump curve and other applicable design specifications.
- b. A replacement circulation pump shall provide, at minimum, the flow rate as indicated in 01(c), above.
- c. There shall be no significant increase in any pump capacity without approval to prevent a potential entrapment hazard.
- d. To avoid a shock hazard air pumps shall be installed on a wall or with a vertical loop of pipe, both, 12 inches or more, above the operating water level of the spa/special use pool.

### 05 Vacuum Limit Switch

<table>

</tr>
</tbody>
</table>

Provide a copy of the installation diagram

### 06 Automatic Chemical Controllers

(required on all public spas and some special use pools with special features)

Note: Replacement of an automatic controller is not a substantial alteration; however, the installation shall be in accordance with rule 3701-31-07.

### 07 Pipe

Pipe used for maintenance or repair work or as part of equipment installation shall be according to the following standard or equivalent:
PVC, Schedule 40 or 80, ASTM D 1785 (of equal diameter or greater) and with compatible PVC fittings: ASTM D 2446 or D 2447.

**Note:** The above information will be forwarded to the local health district to verify the installation after approval.

### IV Remarks

Individual to be contacted regarding this project (please print):

<table>
<thead>
